

Medical Doctor With Over 30-years of Medical Experience Warns:

Deceptive Regulatory Code Set to Take Away Our Vitamin and Mineral Freedom of Choice! (Would Make Vitamin C Above 200mg per Day Illegal)

CODEX ALIMENTARIUS is a WTO-sponsored global food standard that is deceptively promoted as “consumer protection”. It is based on junk science (by wrongly treating nutrients as toxins) and is a serious threat to your health freedom. CODEX ALIMENTARIUS serves the financial interests of massive multi-national corporations who are **illegally** pushing to implement CODEX ALIMENTARIUS in the United States of America.

CODEX is harmful... because it says “Yes” to...

- Supplement doses so low that they can't have any therapeutic effect on you
- Making Vitamin C above 200mg/day an illegal substance
- Forbidding all but a tiny number of supplements sold in incredibly tiny doses
- Forbidding all but manufactured (synthetic) forms of supplements

CODEX is harmful... because it says “Yes” to...

- Destroying the Wellness Industry for the sake of wiping out competition to the Pharmaceutical Industry (the more people turn to natural health, the less drugs they buy)
- Ruining health food stores by wiping out natural health products
- Preventing you from benefiting from new and natural supplements
- Gradually eradicating the natural medicine modalities that you use and benefit from today

CODEX is harmful... because it says “Yes” to...

- Mandating that all food animals be treated with *hormones* despite their documented dangers to you and your family
- Mandating that all food animals be treated with *antibiotics* despite their documented dangers to you and your family
- Mandating that all dairy cows be treated with Monsanto®'s bovine growth hormone despite its conclusive and documented dangers to you and your family

CODEX is harmful... because it says “Yes” to...

- Unlabeled use of Genetically Modified Organisms (GMOs) across the planet, despite their documented dangers to you and your family

CODEX is harmful... because it says “Yes” to...

- Raising permissible levels for pesticides, veterinary drugs and other toxins in farming to extremely dangerous levels (so manufacturers of these poisons can make more money)

CODEX is harmful... because it says “Yes” to...

- Mandating that all food must be irradiated unless eaten locally and raw

CODEX is harmful... because it says “No” to...

- Your freedom of choice in health products and natural medicine treatments
- Clean, unadulterated food and a properly certified organic farming system
- Our planet's environmental health (CODEX would toxify our world even more)

How can you learn more about CODEX ALIMENTARIUS? What can you do about it? Find out by visiting this up-to-date information web site headed by Rima E. Laibow, MD: www.HealthFreedomUSA.org
